

NOTICE

AVOID DIRECT CONTACT WITH BIRDS.

DO NOT feed, touch or remove birds. Walk cautiously where birds gather to avoid bird poop.

If you encounter a sick or dead bird, report it to the New Jersey Department of Environmental Protection's (DEP) hotline at 877-927-6337

Wild birds may carry Highly Pathogenic Avian Influenza (HPAI) H5N1, also known as bird flu. HPAI mainly spreads among birds but may infect humans or pets. You can reduce your risk of infection by avoiding areas with sick or dead birds and keeping your pets away from them.
