PROPERTY CERTIFICATION FOR SEPTICS & WELLS

Freehold Borough, Freehold Township, Manalapan Township, and Tinton Falls Borough residents selling or renting their properties are required to do the following before an approval for Certificate of Occupancy can be granted:

- The well water must be analyzed by a state certified water-testing company. The water test results are valid for 12 months with the exception of bacteriological portion of the analysis, which is valid for 6 months only. The Health Department requires an original water test report from the lab for review. Faxes or copies will not be accepted.

- An Onsite Septic Inspection must be conducted by an experienced septic system professional. The report must follow the NJDEP guidelines and utilize the NJDEP four page inspection form. This report shall be submitted to the Freehold Health Department for review and approval. A passing result is valid for 6 months.

- NOTE: The septic tank(s) must be pumped as part of the onsite septic inspection process.
